

CITY OF EL PASO, TEXAS**AGENDA ITEM DEPARTMENT HEAD'S SUMMARY FORM**DEPARTMENT: El Paso Police DepartmentAGENDA DATE: August 11, 2009CONTACT PERSON/PHONE: Terrence Freiburg Purchasing Manager 541-4313/
Police Chief Gregory Allen 564-7000DISTRICT(S) AFFECTED: A11**SUBJECT:**

Request of City Council approval to upgrade capability to our current AFIS (Automated Fingerprint Identification Software) system to be able to accept the full hand palm records. MorphoTrak is the sole source provider of all software components specific to our current MetaMorpho AFIS system.

BACKGROUND / DISCUSSION:

The El Paso Police Department needs to upgrade current AFIS system. This upgrade will accommodate the recent change in Texas DPS AFIS submission policy. Allowing present AFIS to electronically receive and store full-hand palm print and palm print data to the Morpho proprietary data and communicate directly and seamlessly with the MetaMorpho AFIS system. Since this is a customization to an existing subsystem and not a complete technology replacement, no other manufacturer can supply the software, customization and knowledge needed to integrate into the EPPD AFIS system. The current AFIS was purchased and installed a year ago; to purchase the latest version of AFIS, capable of accepting full hand palm records, would cost approximately \$1 million.

PRIOR COUNCIL ACTION:

The funds were identified for this purpose as part of Justice Assistance Grant from the Office of Justice Programs.

AMOUNT AND SOURCE OF FUNDING:

This purchase will be funded out of this grant JAG Technology & Program Assistance G210719 for the amount of \$81,000 through Fund 05401; Dept. ID 21150010; Acct 508010; Class 21000

Re: Purchasing of customized software to upgrade the EPPD MetaMorpho Automated Fingerprint Identification System to electronically receive and store full-hand palm records submitted from live-scan units, and to accommodate the recent change in Texas DPS AFIS submission policies.

The Police Department recommends utilizing MorphoTrak, Inc. as the sole vendor to build, install and maintain this software upgrade to the existing AFIS System located at Police Headquarters. It is further recommended a purchase order in the amount of \$81,000.00 be issued to MorphoTrak, Inc. This expenditure will come from an existing JAG grant. The following are the factors used to evaluate the use of this procurement program as the best approach:

1. *Is there an urgent need for the product/service? In other words, is time of the essence?*

Yes. When we updated to our present AFIS system it did not have the capability to accept the full hand print. Up until last month the State of Texas did not require palm prints, thus the live scans at the jail were only designed to record and transmit the fingers, which we were able to accept. The State of Texas has now changed their requirements and has modified their live scans to record and transmit the full handprint. Since our AFIS will not accept full hand impressions a large number of electronically submitted records are being lost, as they cannot be processed.

2. *Does the purchase through the Program promote the standardization of equipment?*

Yes. All areas of finger and palm print identification within The El Paso Police Department are either MorphoTrak products or maintained by MorphoTrak technicians. Our existing maintenance contract with MorphoTrak will absorb this upgrade.

3. *Does the purchase through the Program support local business? If not, is there a comparable product/service available locally?*

No. Since this is a customization to an existing subsystem and not a complete technology replacement no other manufacturer can supply the software, customization and knowledge needed to integrate into the EPPD AFIS system. This necessitates that installation, configuration and support for the system is provided by specially trained MorphoTrak Customer Service Engineers on a hardware platform certified and tested to match the primary AFIS. As such, MorphoTrak is the only vendor capable of providing maintenance services.

GRANT FUNDS

4. Do the available vendors have prior work experience and/or familiarity with the City?

Yes. MorphoTrak has had a long and very successful partnership with the City of El Paso since installing the department's first AFIS System in 1991, followed by an upgrade in 1999 and the MetaMorpho AFIS System in 2007. MorphoTrak over the last 18 years has worked diligently to provide outstanding technology, service and value to the El Paso Police Department.

5. Is the pricing reasonable as compared to other similar products/work performed for the City of El Paso in the past or as quoted from other companies?

Yes. Even though this is a "sole source procurement", MorphoTrak has proven itself throughout the years regarding price reasonableness, including prior purchases of software, maintenance agreement purchases, and being awarded contracts after a competitive bidding. MorphoTrak's philosophy has always been one of innovation and partnership with the El Paso Police Department and has continually provided pricing and expertise toward that goal.

SOLE SOURCE AFFIDAVIT

THIS IS AN OFFICIAL PURCHASING DOCUMENT - RETAIN WITH PURCHASE ORDER FILE

Before me, the undersigned official, on this day, personally appeared Phillip Moore, a person known to me to be the person whose signature appears below, whom after being duly sworn upon his/her oath deposed and said:

1. My name is Phillip Moore. I am over the age of 18, have never been convicted of a crime and am competent to make this affidavit.
2. I am an authorized representative of the following company or firm: MorphoTrak
3. The above named company or firm is the sole source of the following item(s), product(s) or service(s).
Full Hand Baggage to Conform to TxDPS Changes
4. Competition in providing the above named item(s) product(s), service(s) is precluded by the existence of a patent, copyright, secret process or monopoly as stated under Section 252.022, Subchapter A of the Local Government Code 7A or as provided for under 7B-F of the same section. Also, attached hereto is a sole source letter, which sets forth the reasons why this bidder is a sole source provider (dated and signed).
5. There are no other item(s) or product(s) available for purchase that would serve the same purpose or function.
6. Note: This bidder understands that by providing false information on this Sole Source Affidavit, it may be considered a non-responsible bidder on this and future solicitations and may result in disqualification of any bid business with the City of El Paso.

Re: Technology Options for Automated Fingerprint Identification System

Lt. Valenzuela,

This letter is to confirm that MorphoTrak, Inc. is the sole source provider of all software components specific to your MetaMorpho Automated Fingerprint Identification System (AFIS) and is pleased to provide this proposal for upgrading your present AFIS system to accept submissions of full-hand palm records. This upgrade will accommodate the recent change in Texas DPS AFIS submission policy, and allow your present AFIS to electronically receive and store full-hand palm records submitted from any live scan device. This upgrade consists of complex hardware and software components specific to your existing AFIS system.

The MetaMorpho AFIS System uses a proprietary data format, and proprietary encoding and matching algorithms to produce a high degree of accuracy that fall beyond the expertise of other software vendors. This includes the functionality to convert the NIST standard format palm print and palm print data to the Morpho proprietary data to communicate directly and seamlessly with the MetaMorpho AFIS system, which no other vendor can supply.

Further, since this is a customization to an existing subsystem and not a complete technology replacement no other manufacturer can supply the software, customization and knowledge needed to integrate into the EPPD AFIS system. This necessitates that installation, configuration and support for the system is provided by specially trained MorphoTrak Customer Service Engineers on a hardware platform certified and tested to match the primary AFIS. As such, MorphoTrak is the only vendor capable of providing maintenance services.

S E R V I C E S O L U T I O N S S U C C E S S

TO: Lt. Valenzuela
FROM: Bruce Orndorf
DATE: 07/23/2009
RE: AFIS upgrade

As you know when we updated to our present AFIS system it did not have the capability to accept the full hand print, only the cropped portion or lower palm area. While our live-scans are capable of capturing the full hand, they are presently programmed to only submit that cropped portion of the hand that AFIS can receive and store. Up until last month the State of Texas did not require palm prints, thus the live-scans at the jail were only designed to record and transmit the fingers, which we were able to accept. The State of Texas has now changed their requirements and has modified their live scans to record and transmit the full hand print. Since our AFIS will not accept full hand impressions a large number of electronically submitted records are being lost as they cannot be processed through the FDR.

MorphoTrak, our AFIS vendor, has since developed technology that will allow us to receive and store the full handprint. We are submitting the following documents for your review, as we understand there is grant funding available that will allow our department to purchase this technology and upgrade our AFIS System, to finally allow for the receiving and storing of the full handprint.

1. Pricing proposal dated July 6, 2009 from MorphoTrak
2. Sole Source Justification letter dated July 22, 2009 from MorphoTrak
3. Sole Source Affidavit
4. Technology Purchase Request
5. Five Factors Questionnaire
6. Requisition Form

Respectfully Submitted,

Bruce Orndorf, C.L.P.E.

El Paso Police Department
Attn: Mr. Bruce Orndorf
911 N. Raynor
El Paso, TX 79903

Dear Bruce,

MorphoTrak is pleased to provide this revised proposal for modifying the AFIS to accept submissions of full-hand palm records. This modification will accommodate the recent change in Texas DPS AFIS submission policy. Currently the FDR will not allow processing of live scan full hand images. The planned modification will allow the FDR to process full hand records as if they were segmented palm records and as we have discussed, this will result in all palm records being routed to QDC for segmentation review. The functional search area of the palm print will remain the same, the segmented lower palm area only, this modification will not provide any additional functionality other than the ability to accept and store the full hand image.

Also note that the additional size of these records will accelerate the need for additional storage. Your system is still well below the design storage space, but the additional size of these records does represent an accelerated use of storage.

If you would like to proceed with making this change, please sign and return the attached proposal and return. Your signature constitutes your agency's acceptance of this change and authorizes Sagem Morpho, Inc. to perform this work and work will be scheduled upon receipt of the signed proposal.

Please do not hesitate to contact me if you have any questions. I can be reached in the Austin office at (877)499-8174 or by email at phil.moore@morphotrack.com.

Sincerely,

Phillip Moore

Describe in detail the Equipment/Software/Services to be purchased: Modification software to the existing Automated Fingerprint Identification system (AFIS) to receive and store electronically, the full hand image. This modification will accommodate recent changes to the State AFIS submission.

Detail the intended use of the equipment/software/services described above: Our present AFIS system only accepts the cropped portion of an electronically submitted palm print impression from live-scans. Up until this month the State of Texas did not require palm prints and thus the live scans at the jail, owned by the State, were only designed to record the fingers. Those live-scans have now been modified to record and transmit the full palm impressions of all arrestees. Since our AFIS will not accept full palm impressions we are unable to receive and store those particular records.

Is the intended use: Enhancement

Estimated cost of the equipment/software/services described above: \$81,000

Quantify the benefit that will be derived through the purchase of the described equipment/software/services: This will allow the EPPD A.F.I. System to accept electronically and store the full hand impressions of all individuals arrested and processed throughout the County of El Paso. These submissions will vastly increase the present AFIS database of finger and palm print records, which will ultimately assist in reducing crime by identifying those subjects involved.
